

Your Information Pack

Dear user,

You will find below the content of your information pack, it gathers all the information you will need to buy the right tire for your vehicle.

Here is the information from michelin.ca on your tire search for:

Your selected tire

MICHELIN®

Latitude® X-Ice® Xi2

Light Truck, SUV/Crossover

MICHELIN® Latitude® X-Ice® Xi2™ tires are designed to help Crossovers and Sport Utility Vehicles hold the road in a variety of wintry conditions.

Ultimate snow & ice confidence

Long lasting winter tread

Great fuel efficiency

Winter

Key benefits

Michelin always aims to bring together multiple performances.

At MICHELIN, we continuously push safety, durability and fuel efficiency, and even more performances, all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™, which has and will always be our difference on every tire.

Cold weather driving mastery for your SUV & crossover vehicle

A wide tread contact patch generates acceleration and braking power, as well as cornering traction, for outstanding winter manoeuvring. The special Flex Ice™ compound is formulated to maintain its flexibility under the most extreme cold weather conditions, including snow, slush, ice, wet and dry.

Better traction in all winter conditions

Cross Z-Sipes™ Technology uses a special 3-D design that locks the sipes in place. Combined with micro-pumps, they provide improved stability in all winter conditions. And because the sipes and micro-pumps are full-depth, their grip lasts winter after winter.

Cruise smoothly and quietly in cold weather conditions

Michelin Comfort Control Technology™ helps deliver one of the most comfortable rides in the industry by using computer-optimized design and precision manufacturing to offer greatly reduced vibrations and road noise, plus the longevity you expect from Michelin.

Keep in mind

You will find below some helpful questions to ask your dealer :

- If the tire you've selected is not immediately available at your dealer, you can always ask them to order it. It may be available in just 1 – 2 days.
- Remember that a good price does not reflect a tire's value: a tire that last longer, helps you save fuel, and keeps you safe in every condition has greater value in the long run.

Manufacturer's Suggested Retail Price (MSRP) is for a tire only (i.e., excluding services such as mounting, balancing and tire disposal) and is applicable for all provinces and territories of Canada. Actual pricing may vary based on retailer, region, tire size and other factors. Retailers are free to set individual prices. Please check with your local Michelin tire dealer for pricing near you.

>>The dimensions shown are average tire design values for tires measured on specified measuring rim widths. Some tires may vary from this value by +/- 3% of the section height (affecting overall diameter), and +/- 4% of the section width.

WARNING: Serious or fatal injury may result from improper mounting, from underinflation/overinflation/overloading or from tire damage due to abusive use.

Michelin North America (Canada) Inc. does not endorse the operation of any vehicle in an unsafe or unlawful manner.

Exceeding the safe, legal speed limit is neither recommended nor endorsed.

IMPORTANT: While all-season tires are designed to provide reliable performance in moderate winter conditions, the use of four (4) tires is recommended for optimal performance and may be mandatory in certain jurisdictions.

DANGER: Never mount a 14" diameter tire on a 14.5" rim, or a 15" diameter tire on a 15.5" rim, or a 16" diameter tire on a 16.5" rim, or a 17" diameter tire on 17.5" rim, or a 19" diameter tire on a 19.5" rim, or a 22" diameter tire on a 22.5" rim, or a 24" diameter tire on a 24.5" rim.

Passenger sizes in Light Truck/SUV applications have reduced load capacity. This will differ from the maximum load branded on the tire sidewall.

Government UTQG Ratings do not apply to winter tires.
